

ALPHA[®] Sn63Pb37 VACULOY[®] SOLDER ALLOY

DESCRIPTION

ALPHA Sn63Pb37 Vaculoy is manufactured using high purity raw materials and the alloy is conditioned using Alpha's Vaculoy viscosity and dross lowering treatment. This results in a pure low dross high fluidity solder alloy, which is free of cast in impurities and included oxides.

FEATURES & BENEFITS

ALPHA Sn63Pb37 Vaculoy treated prior to casting: this removes finely divided suspended oxides that are found in all virgin raw materials. This increases the fluidity and hence soldering defects.

- The remove of the finely divided oxide reduces drossing rate, the wave stays cleaner, longer.
- Has a proven track record; no need to take chances.

APPLICATION GUIDELINES

ALPHA Sn63Pb37 Vaculoy is the ideal companion product for all wave soldering systems. ALPHA Sn63Pb37 Vaculoy is ideal for the following types of applications:

- High volume wave soldering processes
- Applications requiring dual wave and chip wave systems
- Boards that are densely populated

A solder pot temperature of 240 to 250 °C is recommended. For suitable wave solder fluxes, please see our selector guide. Reclaim services, including dedicated lead-free containers, are also available. Please consult your local sales office.
